

MeetingToAction

Turn a meeting into an execution-ready action pack.

Track 2 • Enterprise productivity

Built with OpenAI Agents SDK + Codex

100% synthetic data

Decisions made in meetings evaporate

Lost

owners, dates and decisions slip after the call ends.

Re-work

someone re-listens and writes the recap by hand.

No follow-through

action items and follow-ups rarely happen consistently.

Pulling out decisions, owners and follow-ups is exactly what an agent can do from the transcript.

Three agents, every line traceable

1

Extract

Decisions, actions and risks — with citations.

2

Plan

Workstreams, updates, calendar follow-ups.

3

Follow-up

A drafted email to participants.

Guardrail: nothing is sent until a human approves.

WHAT THE JUDGES SEE

Paste a transcript, get an action pack

Action board

Action items on a kanban by status; decisions and risks cited to the line.

Execution plan

Workstreams, project updates and calendar follow-ups.

Follow-up ready

A drafted email — approve & queue, or return for edit.

Meetings that actually turn into work

Minutes

to a complete, cited action pack.

Owned

every action item has an owner and a status.

Traceable

each decision linked to the transcript.

Scale: Standups, project syncs, incident reviews, sales handoffs — any meeting.

From talk to traction.
